Accession Number: 2014.0011

Date of Records: 2003-2011

Size: 1 Box, 1 Oversize Folder

Finding Aid: By Eric W. Boyle (2014)

Access and Use: The Otis Historical Archives is committed to providing open access to its collections as far as possible within the limits of privacy and confidentiality. Access to this collection is at the discretion of the Otis Historical Archives and material contained within the records may be subject to review before access is granted.

Series/Scope and Content Note: This collection consists of the records provided by Major Robert Lowen from his involvement with the 485th Medical Detachment from 2010-2011, a period overing the transition from Operation Iraqi Freedom to Operation New Dawn. The 485th MED DET provided a wide range of preventive medicine services including food and sanitary inspections, water quality testing, air and soil testing, basic pest management and surveillance, along with providing technical consultation support, outbreak investigations, health promotion and education, and collaboration and training with Coalition/Iraqi partners. The materials in this collection provide documentation of these types of preventive medicine measures, which relates closely to other existing OHA collections.
